

# 2021 Fekete Furmint

## Somló, Hungary

Somló is Hungary's smallest appellation and once an underwater volcano. Now dormant, its slopes of ancient sea sediment, hardened lava, and basalt are home to some of Hungary's steepest, most densely planted vineyards. Driving up to Somló from Lake Balaton, it's like seeing an island rise up from the ocean's horizon – nothing else around survived the retreating ocean. The oldest writings mentioning the wine of Somló date back to 1093 and viticulture all the way back to the Romans. Hungarian Kings bought vineyards here, Maria Theresa and Queen Victoria both praised the wines, and insurgent Hungarian troops fighting against the Hapsburgs would solute the vineyards as they marched past at the end of the 17th century. Perhaps most well known is that belief that drinking the wines of Somló before copulation would guarantee a boy. Today, "The Grand Old Man" of Somló is Fekete Béla. 32 years ago, while on a trip to buy grapes for his garage production, a farmer offered to sell his vineyards on the southern slopes. Fekete accepted and approaching 90 years old, still tends his 4 hectares of beloved Fehérvári-cru. Everything is done by hand, and much like the man, his wines are honest, engaging and highly expressive of the region. Focusing on Hárslevelű, Furmint, Olaszrizling, and Juhfark, Uncle Béla, and his wife, Aunt Bori decided that 2013 would be their final vintage.

### VINEYARDS

Béla was engaged in a private dialog with his land that's only possible after decades of working it. The vineyards are not as postcard perfect nor are they planted to the newest clones but having listened to the old farmers and the council of others when we started, Béla's vines have achieved balance. With 4 hectares dry farmed on the southern slopes, the basalt soil retains heat and a mixture of alluvial and loam soils give just enough nutrients. The vineyards have a secret garden appeal that's far from a monoculture. Organic certification is underway and more an issue of paperwork than changes to the farming. Equally important, and also according to Béla, the vineyard access to the mineral spring water of Somló is the magic, not simply rocks touching vines. In tandem with botrytis and 3 years minimum of *élevage*, there's a perfect storm for making something truly unique and delicious.

### WINE MAKING

The wines of Somló tend to be high in alcohol, very acidic, and chock-full of smoky volcanic minerality. All wines are meant to be aged and can be fairly aggressive when young. Much like Tokaj, this is an all white appellation so winemaking is geared for structure and strength. All of the wines are picked on the later side, have a couple of hours of maceration, spontaneously fermented in 1000L oak, aged another 10-12 months in said oak, and then 2 years minimum in stainless steel/plastic tank. The grapes do of course bring something to the table, but with time, Somló eventually takes over. That said Furmint has a little more acidity up front, Hárslevelű more aromatics, and Juhfark channels the volcanic funk.

### NOTES & PAIRINGS

While most may be more familiar with Furmint from Tokaj, this is a completely different animal. This is especially the case with a warm vintage like 2018 where higher levels of residual sugar were not needed to balance out over the top acidity. The acidity is still nearly 8 g/l, so it's hardly subtle, but there's ripeness behind it. While only macerated for 4 hours, the *élevage* is also what matters here. Gently pressed and fermented in 1000L Hungarian Oak barrels, it then spends 10 months on the lees. It's then moved to 500 and 1500 liter tanks for reductive aging for a minimum of two years before bottling. No racking and no stirring. A "fresh" wine all things considered, the naturally high acidity and aromatic neutrality of Furmint allows Somló to shine clearly.

### ANALYTICS & PRONUNCIATION

APPELLATION: Somló (Shoam-low)

GRAPE COMPOSITION: 100% Furmint

CLIMATE: Cool Continental

SOILS: Basalt and ancient seabed

EXPOSURE: Southern

MACERATION & AGING: Fermented in 1000L Hungarian Oak barrels, 10 months on the lees then aged two years in tanks.

ALCOHOL: 14.3%

RESIDUAL SUGAR: 2.8 g/l

ACIDITY: 7.97 g/l
