

2021 Pfneisl Zweigler

Burgenland, Austria

The young and charming sisters Birgit and Katrin Pfneisl, partners in Pfneisl Winery are responsible for the equally charming Kékfrankos (AKA Blaufränkisch). Birgit is responsible for the vineyards and winemaking, Katrin marketing and sales. Born and raised in Austria, their grandparents fled their vineyards in Sopron to escape Communism and settled just across the border in Kleinmutschen, Burgenland, where the “z” was dropped from their surname. In 93’ the Pfneisl family re-acquired their Hungarian vineyards. Having since established Weingut Pfneisl, one of Austria’s premier red wine estates, Birgit and Katrin’s father Franz Pfneisl and his brothers, decided to give these ancestral vineyards to the sisters. After completing her University studies, Birgit set out to work far away from home. She made wine in Italy, Australia, New Zealand, South America and the US before returning home with dreams of an organic estate. Starting with the inaugural 04’ vintage, the Pfneisl vineyards were farmed organically, in 09’ they were certified Organic. In addition to the fine Kékfrankos, Birgit makes the delightful frizzante Sparkelina, a stylish Merlot, and a range of thoughtful cuvees.

VINEYARDS

Sopron is an old Hungarian wine village just west of the southern tip of Lake Fertő (Neusiedler See). The prized vineyards around it are mostly Austrian, though what is Hungarian is ideal. Most of the Pfneisl vineyards are in the dry farmed, slate and sand stone site of Kräftner. This south east facing slope was replanted about 12 years ago, healthy plots of old vines were left intact. Varieties include, numerous clones of Kékfrankos, some as old as 35 years, Merlot, Zenit (a local white grape), and small amounts of Sangiovese, Malbec, Zinfandel and Shiraz. Birgit employs a wide range of organic techniques ranging from standard practices like native crop cover to less conventional methods like insect pheromones. Birgit’s decision to pursue organic farming was at first controversial. Idealistic in nature, organic farming in reality is challenging and risky. So far, Birgit’s idealism and intuition are paying off.

WINE MAKING

Grapes are sorted and de-stemmed at the winery. Fermentation is conducted exclusively with native yeast. The Classic line of wines are fermented and aged in stainless steel while premium wines are aged in a combination of new and used oak, mostly of Hungarian or French stock. Malolactic fermentation is encouraged to finish though not demanded and a small amounts if residual sugar are permitted if a wine does not ferment completely dry. Most wines are lightly filtered.

NOTES & PAIRINGS

Another fun and delicious project from sisters Birgit and Katrin Pfneisl. Rather than make wine with their father and uncles who run the well established family estate in Austria, the sisters decided to farm their ancestral vines in Sopron, Hungary. From the outset, their wines contrasted sharply with those of their elders. Organic farming, old vines and wild fermentation, all contribute to the finesse of their wines. They’re lighter, prettier, less structured, more aromatic, so we were happy to discover Birgit and Katrin’s increasing involvement in the Austrian estate. The Austrian Zweigler is another collaborative project born from the common goal of deepening our relationships with each other and our common love of Austria’s dearest red grape, Zweigelt.

ANALYTICS & PRONUNCIATION

APPELLATION: Burgenland

GRAPE COMPOSITION: 100% Zweigelt (ZZ-why-gelt)

CLIMATE: Continental

SOILS: Heavy loam soil

MACERATION & AGING: Fermentation and maceration in stainless steel.

ALCOHOL: 13%

RESIDUAL SUGAR: 4.8 g/l

ACIDITY: 5 g/l

DANCH & GRANGER SELECTIONS
